The image shows a square grid of 131 rows and 131 columns, totaling 17681 cells. Each cell contains a single character, either 'v' or 'x'. The characters are color-coded based on their row and column indices. The colors follow a repeating pattern of 16 distinct colors: black, white, red, green, blue, orange, yellow, purple, pink, brown, grey, cyan, magenta, light blue, light green, light orange, and light pink. The 'v' characters are primarily in black, white, red, green, blue, orange, yellow, and purple cells. The 'x' characters are primarily in pink, brown, grey, cyan, magenta, light blue, light green, light orange, and light pink cells. The pattern of 'v's and 'x's is non-repeating across the grid.
